DX/SWL/MEDIA PROGRAMS April 5: <http://www.worldofradio.com/dxpgms.html>

\*\* ALASKA. April 9 at 0600-0630 UT, The Travel Channel will repeat  
 Cash Peters, Stranded in Barrow, Alaska, including a visit to KBRW  
 680; saw it UT Thursday April 6 at 0300 (Glenn Hauser, OK, DX  
 LISTENING DIGEST)

\*\* ALBANIA. Dear Glenn, found Radio Tirana at 2130 UT, on 7455 in

English. QRM from Greece quite heavy, 7465 would have been better!  
Best Regards (Christopher Lewis, England, April 5, DX LISTENING  
DIGEST)

[non]. When trying to hear Albania on 9920 kHz here at 19 UT, I only  
hear a QSO in USB on 9921 kHz - in an unknown language. JRC NRD-535.  
Anybody else hearing this? 73, (Erik Koie, Copenhagen, Denmark, April  
5, dxldyg via DX LISTENING DIGEST)

\*\* ARGENTINA. Hi, Glenn. Cf. DXLD 6-006, the Argentine station La Voz  
de las Madres was heard today at around 1100 UT on 530 kHz. I don't  
remember to have heard this station before, and I scan this part of  
the MW band very often. The signal is fair but perfectly audible.  
Heard with folk music, news and then Brazilian music. No commercials,  
just an announcement from the government Human Rights Office. They  
give the e-mail address radio@madres.org Rx. Sony ICF-7600 DS+ 3 m  
wire (indoor) 73. (MoisÈs Knochen, Montevideo, Uruguay, April 6, DX  
LISTENING DIGEST)

\*\* ARGENTINA. RAE, on 11710 at 0200, March 25, regular male announcer,  
news preempted by special program commemorating 30th anniversary of  
Argentine military coup, and end of PerÙn's government, in 1976. Fair  
reception, tho' deteriorates at 0230 as usual (Eric Bryan, WA, DX  
LISTENING DIGEST)

\*\* ARMENIA. Contrary to their on-air announcements, Voice of Armenia  
has moved from 9965 to 9960 at 1910 UT, from 2010. The announcer  
continues to cite the old time/frequency, as late as 3rd April (Eddie  
McKeown, April 5, BDXC-UK via WORLD OF RADIO 1311, DXLD)

Different names are used for Armenian Radio's external services. In  
German, ``Radio Armenia``, in English and Spanish ``Public Radio of  
Armenia`` (Dave Kenny, DX News, April BDXC-UK Communication via DXLD)

\*\* AUSTRIA. I confirm the North American service in English on 9870 at  
0045, 0115 and 0145; times vary: English sometimes starts 1-2 minutes  
early (Bob Thomas, Bridgeport CT, April 3, DX LISTENING DIGEST)

\*\* AZORES. Thanks to Ben Dangerfield --- 2200 EST [sic], 694 kHz,  
"Antena Um", Terceira, Azores // RDP Antena 1 web audio, distinctive  
piano jazz vocal, announcements and IDs at 2159, four long and one  
short pip, news. Domestic slop to contend with, so best in USB 1.8  
filter setting. A new country here, #60, in April no less! No sign of  
the BBC (Jim Renfrew, Byron NY, April 4, amfmtvdx at qth.net via DXLD)

EST??? I guess he means EDT = 0200 UT April 5 (gh, DXLD)

\*\* BELARUS. R. Belarus English - Still On? Can anyone receive the 0200

UTC Radio Belarus English broadcasts? Have tried these frequencies for A06, as listed on the ILGRadio site. without success: 5970, 6170, and 7210. Are they off-the-air? Changed times and/or frequencies? Thanx and 73, (J. D. Stephens, Hampton Cove, Alabama U.S.A., April 5, HCDX via DXLD)

0100-0300 UT portion is very uncomfortable for the average European listener in deep night. But I can tell you, that R Belarus is on air at present [April 5th] from 1900 to 2200 UT on powerhouse 7105 kHz S=9+30 dB, \\ co-channel Vietnam suffering 7280, and also on tiny 7290 kHz Latter S=1-2 only. 73 wb (Wolfgang B.schel, ibid.)

\*\* BOLIVIA. 6165, Radio Logos (presumed), 0950-0954 April 5. Noted a man in Spanish religious comments until 0953 when religious music is presented. However, at 0954 music quits and from that point onward, nothing but dead air. I am still hearing the stations carrier, but no audio. There's also an interfering noise that sounds man-made. It wasn't on the frequency when I tuned in at 0950, but came up around 1000. So I am assuming it's not something in my home? Radio Logos never came back (Chuck Bolland, Clewiston, Florida, NRD545, HOMEBREW Dipole, DX LISTENING DIGEST)

øSería Radio Logos la emisora que llega muy bajo, en 6165 Khz, sobre las 0950 UT con espacio religioso? La se0al es casi inaudible m·s all· de las 1005 aunque un colega estadounidense (creo que Scott Barbour) en la Lista DXplorer, la recepci0n justamente en el mismo horario en que lo hice yo, con QSA aceptable por un lapso bastante prolongado de tiempo.

Hola gente! Sigue escuch·ndose con buena se0al, pese a las pobres condiciones de propagaci0n, la emisora boliviana Voz del Campesino, desde Sipe Sipe, en los 5680.68 kHz. Hoy entraba "como ca0n", desde minutos antes de las 1000 UT. La escuchÉ íntegramente en quechua, con musica andina. QSA 3 y por momentos 4, considerando que no había nada interesante ni en 60 ni en 49 metros. 73 (Arnaldo Slaen, BUENOS AIRES, ARGENTINA, April 5, condig list via DXLD)

\*\* BRAZIL. BRASIL - A R·dio Gazeta, de S,0o Paulo (SP), voltou a ser sintonizada em 9685 kHz, em 31 metros. Em cinco de abril, por volta de 1300 UT, Domingos Alfredo Loss captou a emissora, em Colatina (ES), com excelente sinal. Ele notou, no entanto, que o ·udio apresentava uma distorÁ,,o. 73s, (CÉlio Romais, Brasil, radioescutas yg via DXLD)

\*\* BRAZIL. On April 5th I noted R·dio Difusora de Macap· on 4915 kHz at 0430 UT with mostly non-stop music. Fair signal in Sweden.

On April 5th I heard R·dio Clube do Para on 4885 kHz with mostly non-stop music at 0400 UT. Identifies frequently as "R·dio Clube". Good

signal (Christer Brunstr m, Sweden, DX LISTENING DIGEST)

\*\* CANADA. CBC Hotsheet Wednesday April 5, 2006

5. DEAD DOG IN THE CITY: Back by popular demand! The Dead Dog Caf  returns to CBC Radio tonight! There have been some major changes at the Caf , and we're not talking about renovations. The place has been sold, and Gracie has packed up everything and moved to Toronto to team up with a high-powered television executive who wants to produce a cooking show with Gracie as its star. Jasper is still hustling, but now he's running a pirate radio news show (New World News: Yesterday's News Tomorrow) for three minutes each week on random days so the CRTC can't triangulate the location. There's Rosedale Garbage Day - when you never know what the filthy rich will throw out next. And much more. And Tom? Well, someone has to peel the vegetables and clean the pots. And, of course, pay for the coffee. Don't miss the long-awaited return of the Dead Dog Caf , tonight at 8 p.m. (8:30 NT) on CBC Radio One. (By the way, you can hear more of Thomas King tonight on Between the Covers, as part of a series on great Canadian satirists. Between the Covers begins at 10:43, 11:13 NT) on CBC Radio One. (via Fred Waterer, ODXA via DXLD) Also heard Dead Dog on the 2nd segment of Sounds Like Canada on Thursday April 6 (gh, DXLD)

O'Reilly on Advertising makes its return to the CBC Radio One schedule, at least on Sirius Satellite Radio channel 137, at 10:30 am ET (1430 UT) this Saturday. This according to a just updated schedule available from [cbc.ca/sirius](http://cbc.ca/sirius) (John Figliozzi, Halfmoon, NY, April 5, dxldyg via DX LISTENING DIGEST)

I then looked for it on CBC's own online schedules, but could find no mention of it. It looks as if this would be in the middle of ``Go`` on Radio One if really at 10:30 am local time on Saturdays. And is this a new series, or a repeat of the original series? Why don't they make this clear? (Glenn Hauser, DXLD)

\*\* CANADA. CKNW slashes heralded news team --- ROD MICKLEBURGH

VANCOUVER -- The city's paramount radio station, CKNW, is drastically chopping its highly regarded news operation, just three weeks after losing the rights to broadcast games of the Vancouver Canucks. Known for their reporters' hustle and being first with breaking stories, all-talk CKNW has dominated local news coverage in the city for years. But yesterday, in a terse, four-sentence statement that offered few details, Corus Radio, owner of a cluster of Vancouver-based stations including CKNW, announced that 12 employees were being let go "to ensure that the stations are appropriately structured to remain successful in a competitive marketplace." . . .  
<http://www.theglobeandmail.com/servlet/story/LAC.20060405.BCCKNW05/TPStory/>

(via Kevin Redding, ABDX via DXLD)

\*\* CHINA [and non]. CRI English heard at 2000 on 9600 better than // 11640. At 2100 on 7285 // 9600 (Bob Thomas, Bridgeport CT, April 3, DX LISTENING DIGEST) 9600 is 500 kW Kashi at 308 degrees; 11640 is Bamako, Mali, 100 kW at 111 degrees; 7285 is Cerrik, Albania, 150 kW at 310 degrees (gh, DXLD)

\*\* COLOMBIA. La Radio Televisi n de Colombia (RTVC), que reemplaz  a la liquidada Inravisi n, al parecer realmente est  trabajando en la infraestructura de la onda media; como lo se al  la informaci n del Monitor de la BBC via Glenn Hauser [en febrero]; en los  ltimos d as he podido captar las diferentes frecuencias que tienen en operaci n, a saber:

550 Khz, Medell n desde Marinilla 50 kw (que desde hace varios a os estaba apagada)

570 Khz, Bogot  desde El Rosal 100 kw

580 Khz, Cali desde Jamundi 50 kw

680 Khz, Barranquilla desde Sabanagrande 50 Kw

La  nica se al que no he podido captar pero que estar a operando es la frecuencia 610 kHz desde Uribia en la Guajira. Tambi n est  pendiente la puesta en marcha de otras cuatro se ales que desde el 2004 se encuentran autorizadas por el Ministerio de Comunicaciones y que funcionar an con una potencia de 50 kw y son:

1000 Khz Yopal

550 Khz Neiva

790 Khz Villavicencio

720 Khz Rionegro, Santander

(Rafael Rodr guez R., Bogot , April 5, condiglist via DXLD)

\*\* CONGO [non]. 9610, R Brazzaville (cf. DX Window No. 294). I totally agree with your informant (Korinek Mar 21). I am convinced that what people are reporting as Brazzaville is indeed IBRA via DTK. IBRA is heard well here in New Zealand on 9610 during this time slot, 1900-2045 which is their schedule. I have read reports of Brazzaville being heard and off at 2045?? Too much of a coincidence for my liking so I stick to my belief that it is IBRA broadcasting to Africa in Afro languages and includes some French segments (Ian Cattermole, New Zealand, DSWCI DX Window April 5 via DXLD)

\*\* COSTA RICA [non]. Update on Libyan webcast --- The 9th Provisional World Parliament has been rescheduled: Let's Give It Another Try!!

Join RFPI's General Manager and CEO, James Latham and long-time RFPI producer Jean Parker as they cover the 9th session of the Provisional World Parliament live from the Libyan capital, Tripoli.

Join us for what will be one of the first live Internet broadcasts from Libya as we bring you the deliberations of the Ninth World Parliament, and African Children's Parliament. In the tradition of community radio, we hope to have your participation as well with a special call-in via the internet through Skype and Yahoo! Messenger.

Come join us beginning April 10th with the inauguration of the African Children's Parliament, through April 13th when the Provisional World Parliament comes to a close.

Find out what's new under the Sahara Sun when RFPI sets up its studios in Libya! For background and other information on the conference please visit the World Constitution and Parliament Association's website at <http://www.wcpa.biz/>

The net cast schedule will be posted on RFPI's web site as soon as it is available. <http://www.rfpi.org>

Technical Note: As of this notice, we fully anticipate having a live audio stream in real time from the event. However, several technical issues are still being resolved. At the very least, we will bring you the meeting with a slight tape delay. The audio content will also be available as podcasts soon after it is uploaded to the Internet.

So, whether we're live or we're slightly tape-delayed, we hope to see you there! (RFPI-Announce mailing list April 6, DX LISTENING DIGEST)

\*\* CUBA. RHC English I've heard at 0500 on 9550, 6000, 6060 (or is it 6065?); 6060 has Spanish co-channel, 6065 clearer tho 6060 splattered (Bob Thomas, Bridgeport CT, April 3, DX LISTENING DIGEST) RHC is on 6060. Spain is on 6055 (gh, DXLD)

RHC again heard in English on 11760 at 2030, April 6; at first was rather weak, but then built up to very strong signal by 2050; not sure if they were turning up the power, or we were coming out of a propagation disturbance. At 2045 concluded a commentary by Ol'ga somebody about Guant·namo; she has a very heavy accent, not up to the standard of English spoken by most of the RHC announcers, even Cubans. // 9505, quite weak as usual and the two were an echo apart denoting very different feed routes (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* CUBA [non]. CLANDESTINA, 5910, Radio Rep'blica, 2315-2340, 03-04, comentarios sobre la situacin poltica en Cuba y Venezuela, identificacin: "Radio Rep'blica est· contigo", "...sta es Radio Rep'blica, voz del directorio democr·tico cubano transmitiendo para Cuba con fe en la victoria". A las 2330 programa "Entrevista a fondo". Muy buena seal. 45444 (Manuel Mendez, Lugo, Spain, Grundig Yacht Boy

400, antena telescópica, escuchas realizadas en casco urbano de Lugo, DX LISTENING DIGEST) So no Cuban jamming audible there in Spain on this transmission from Germany (gh, DXLD)

\*\* CZECH REPUBLIC. R. Prague, English at 2130, very good on 11600; also heard very weak // 9410 (Bob Thomas, Bridgeport CT, April 3, DX LISTENING DIGEST)

\*\* DJIBOUTI. Re 6-056: frequency should be 4780, not: ``4870, Radio Djibouti, 0300-0330, 01-04, inicio de la programación a las 0300, c•nticos isl•micos. 44444 (Manuel M•ndez, Lugo, Spain, Grundig Satellit 500 y Sony ICF SW 7600 G, Antena de cable, 10 metros, orientada WSW, Escuchas realizadas en Friol, 27 Km. W de Lugo, DX LISTENING DIGEST)``

\*\* EGYPT. Re 6-057: As reported by some colleagues is nice to know that the engineering department of Radio Cairo finally decided to do its job. Good reminder, by the way, goes to Radio Damascus: what a waste of kW, for God's sake! Radio Cairo opening with FA [female announcer? Frequency announcement?] in Spanish heard this April 5, 0045 on 9415 with clear audio, slight hum, but so different compared with what they have send us for many years (Ra'l Saavedra, Costa Rica, dxldyg via DX LISTENING DIGEST)

R. Cairo, on 7270 at 0200, April 3rd, after ``The Meaning of the Kor'an`` (singing and translation into English), news included coverage of Algeria, Israel, Iran, Iraq, Sierra Leone, Liberia, and Mauritania; best signal in memory of R. Cairo -- for once, speech was easily understandable (usually only the music is listenable here for me) (Eric Bryan, WA, DX LISTENING DIGEST)

I get Cairo at 0200 on 7270 for WNAm better, tho light modulation in parts, than their east coast 11885 at 2300 (Bob Thomas, Bridgeport CT, April 3, DX LISTENING DIGEST) You mean 11950 now (gh)

\*\* FRANCE [non]. RFI apparently back to normal programming, April 5 at 1345 with French talk rather than fill music, on 15515 via Guiana French. One of the better signals on 19m, when most of the other regulars were diminished or missing due to poor propagation (Glenn Hauser, OK, WORLD OF RADIO 1311, DX LISTENING DIGEST)

Solar-terrestrial indices for 04 April follow. Solar flux 100 and mid-latitude A-index 7. The mid-latitude K-index at 1200 UTC on 05 April was 5 (85 nT). The mid-latitude K-index at 1500 UTC on 05 April was 5 (70 nT). Space weather for the past 24 hours has been minor. Geomagnetic storms reaching the G1 level occurred. Space weather for the next 24 hours is expected to be minor. Geomagnetic storms reaching the G1 level are expected (SEC via DXLD)

\*\* FRANCE [and non]. Late? Registrations or changes: [entire A06 uos]

N = DRM mode (April 3, 2006) (via Wolfgang B,schel, April 5, DXLD)

LBJ?? Isn't that LJB for Libyan Jamahiriyah Broadcasting? No, the official HFCC abbr. key shows LBJ = Libyan Jamahiriya Broadcasting as a broadcaster, while LJB means the Libyan delegation as a frequency management organisation (gh, DXLD)

\*\* GEORGIA. Abkhaz Radio on 9495 IDs in Abkhazian as ``Apsua Radio``. ID in Russian is ``Radio Respublika Abkhazian`` (Rumen Pankov, Bulgaria, DX News, April BDXC-UK Communication via DXLD)

\*\* GERMANY. Re DXLD 6-050: The information I distributed in DX-Window no. 294 about DRM tests by the University of Hannover was not taken from the website mentioned by Christoph. I had a long conversation with a technician involved in the project who also told me all their frequencies, which I believe have been published for the first time. I think I have to make this clear (Harald Kuhl, Mar 23, DSWCI DX Window April 6 via DXLD) See also DIGITAL BROADCASTING below

\*\* GERMANY [non]. Hi Glenn; Good (S5-S8) signals here in S. Ontario from DW (English): 9695 0000-0059 and 11865 2100-2159 UT. Both signals have been quite consistent over the past several days here. Much better reception of DW than during the Winter Season (Thomas Moyer, Bowmanville, Ont., Canada, April 5, DX LISTENING DIGEST) These are both Rwanda, at 30 and 295 degrees resp. (gh, DXLD)

DW English very good at 2100 on 11865; not heard on 9440 due to splash from AIR GOS in English, very strong!! Nothing on 15205 (Bob Thomas, Bridgeport CT, April 3, DX LISTENING DIGEST) Via Rwanda, both 15205 and 11865 audible here April 6, but 11865 better (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* GERMANY. Can you please tell me the location of the new V of Russia 1431 kHz Wilsdruff? Is it close to Dresden? (Erik Koie-DEN, wwdxc BC-DX Apr 3 via DXLD)

Situated close to Dresden, 16 kilometers west of Dresden, midst

between Dresden and the Autobahn Highway Triangle (on Exit 76) Dresden  
- Chemnitz, A4 / E40, exit 77. G.C. 51N03:36 13E30:33

Erected in GDR era: Pipe mast of 153 meters height.  
First transmission on 1043 kHz 250 kW, on 1 Sept 1953.  
Official inauguration on 8 May 1954.

1431 kHz - Has been used also as Czech clandestine radio station by  
the Russians (Warsaw Treaty Pact troops) during occupation of CSSR in  
August 1968 til springtime 1969.

TX replaced on 20 June 2001 by new 250 kW (2x125 kW) Telefunken unit,  
fully transistorized.

Reserve unit, 20 kW, inaugurated on 29 Sept 1959. Latter replaced by  
20 kW transistorized unit of Thomcast on 5 Dec 1998.

<http://www.wilsdruff.de/> then click "Leben in Wilsdruff", then click  
"Stadtrundgang"

then spin the wheel / scroll d o w n to  
Picture of the antenna mast and short description like this text:

"Auf der Birkenhainer Hoehe ist der Funkturm nicht zu uebersehen. Der  
153m hohe Antennenmast des Senders Dresden in Wilsdruff ist ein  
weithin sichtbares Wahrzeichen der Stadt. Dieser wurde am 1. Sept.  
1953 in Betrieb genommen und strahlte bis Ende 1989 die Programme DDR  
I und Berliner Rundfunk ab, nach der Wende die Programme des  
Mitteldeutschen Rundfunks. Der Sender ist einer der aeltesten  
Mittelwellensender Europas und sowohl von der Bausubstanz seiner  
Anlagen als auch durch seine technische Ausstattung ein voll  
funktionsfaehiges technisches Denkmal. Heute erfolgt die Ausstrahlung  
durch eine moderne und raeumlich wesentlich kleinere Sendeanlage im  
selben Gelaende."

On Wilsdruff location map "Sitemap / Inhalt" <http://www.de.map24.com/>  
look out for "01723 Funkamtstrasse" location. Click far left (westerly  
direction) (wb, wwdxc BC-DX Apr 3 via DXLD)

Recently concerns arose over the fate of the former GDR radio premises  
at Berlin, Nalepastrafle 18-50, sold in a hurry to a private investor  
in order to finally get rid of that object. The only obvious activity  
of this investor so far was to considerably increase the rents, in  
some cases doubling them, probably in the end forcing many of the  
current users (an orchestra and various production companies) out of  
the studios.

RBB TV report from April 3:

[http://www.rbb-online.de/\\_/abendschau/beitrag\\_jsp/  
key=rbb\\_beitrag\\_mini\\_4049738.html](http://www.rbb-online.de/_/abendschau/beitrag_jsp/key=rbb_beitrag_mini_4049738.html)

Linked there this nice collection of pictures, although as usual limited to the buildings from the fifties, except two aerial shots where the newer E office building and ET studio complex can be seen as well (pictures from inside ET would be a terrible sight):  
[http://www.bbfc.de/bbfc/action/location/showDetails;jsessionid=g6c2ckck91?  
locationNo=005-013&catId=1.4.6](http://www.bbfc.de/bbfc/action/location/showDetails;jsessionid=g6c2ckck91?locationNo=005-013&catId=1.4.6)

-----

T-Systems finally managed to put the right VOR feed on air at Wilsdruff. I am not sure if I checked 1431 yesterday, but today it finally carries the scheduled programming, i.e. during the afternoon Russkoye Mezhdunarodnoye Radio, followed by German from 1500 etc. No more Japanese, Hindi and Persian for Saxonia (Kai Ludwig, Germany, April 6, DX LISTENING DIGEST)

\*\* GREECE. Glenn: Voice of Greece has posted ERA5's Daily, Saturday, and Sunday A06 Analytical Programs in English on their web site:  
<http://www.voiceofgreece.gr/en/program.asp>  
(John Babbis, MD, April 6, DX LISTENING DIGEST) Only 3 zip files now

\*\* GREENLAND. 3815 USB, Greenland R via Anmasalik R, Tasiilaq, 2158-2209\*, Mar 25. Two announcers with long discussions in Greenlandic to 2209 then tentative ID and close. Weak but clear on unusually quiet channel with no utility QRM. 34443 (Michael L. Ford, Newcastle UK, DSWCI DX Window April 6 via DXLD) Now one hour earlier to 2115v\* (gh)

\*\* GUATEMALA. April 5, 2006. From: Dr. ...dgar Madrid, Radio Truth, Chiquimula, Guatemala, C. A. To: Our Radio Friends

Hello! I have very good news for you. After 9 months of difficulties, we have installed a new electronic module on our transmitter today, and it is working fine. We are also happy that the factory has offered to produce any parts we need in the future. So, let's praise God. I hope you tune our signal [4052.5], and let us know how it sounds. Thank you very much. Notice: We'll transmit on Internet very soon (...dgar Amílcar Madrid, Manager and Director, Radio Verdad, April 5, DX LISTENING DIGEST)

\*\* HAWAII. UNIVERSITY RADIO HILO GOES ON AIR --- By Kevin Dayton  
Advertiser Big Island Bureau Posted on: Tuesday, April 4, 2006

Josh Pacheco and Mark Farrell watch "Z" Knight at the microphone of University Radio Hilo, the new campus AM station. After several years of Webcasting, the station went on the air last week, its four fraction-of-a-watt transmitters sending out a radio signal that covers

much of Hilo. [caption]

HILO, Hawai'i ó University Radio Hilo has hit the AM airwaves, carving out a tiny 3-mile broadcast territory around the University of Hawai'i-Hilo that offers an alternative to the slick sounds of commercial radio. . . .

<http://www.honoluluadvertiser.com/apps/pbcs.dll/article?AID=/20060404/NEWS01/604040344/1190/NEWS>

[sidebar:] URH's Webcast continues at <http://radio.uhh.hawaii.edu>

(via Artie Bigley, DXLD) It's 100 milliwatts x 4 on 1640 kHz. Can Richard Wood hear it? (gh, DXLD)

\*\* HUNGARY. R. Budapest, on 9590 at 0100, April 3rd, program in English: Spotlight: relations between Hungary and Britain; fair reception; tried second broadcast at 0230 on 9795 -- inferior to first broadcast (Eric Bryan, WA, DX LISTENING DIGEST)

\*\* INDONESIA. 9525, Voice of Indonesia, Cimanggis, Djawa, 1305 News by man in Indonesian, heard mention of several Indonesian cities, such as Bukittinggi and Pontianak, ID at 1308 and more talk, musical fanfare, then what sounded like commentary by a different man, mention of Papua and Australia. Very strong, would have been 100-percent readable if I knew the language. 04/04/2006 (John Callarman, Krum TX NRD-525, 80-foot inverted L, ABDX via DXLD) More evidence that VOI ought to put their English hour on at this time on this frequency (gh, DXLD)

- English, Chinese & Indonesian language schedules rearranged from excel sheet received from Voice-Australia on 3/21.

- Schedule for Hindi language based on monitoring.

\* Noted on 9570 instead of 12070 on 3/29.

\*\*\*Was announcing 13820 but using 13765 for first few days.

Confirmed that used wrong frequency due to error, back on 13820.

(Alokesh Gupta, New Delhi, India, dxldyg via DX LISTENING DIGEST)

\*\* IRAN. Iran will have no daylight saving [sic] time this year.

According to IRIB Italian program, local government has decided to abandon the seasonal time change as it generates some health problems and confusion! Iran will therefore stay on its UT +3.5 time (Luigi Cobisi, Itlay, Mar 23, DSWCI DX Window April 6 via DXLD)

\*\* ISRAEL. "Easy Hebrew announcement --- Starting Monday, April 10, Kol Yisrael English news will broadcast an easy Hebrew corner on the 6:30 am [Israel Time] broadcast every Monday and again on Thursday at 12:30 pm [Israel Time]. 03.04.2006 13:42"

==

Also, the REKA network transmitter in Tel Aviv on 101.2 FM will be off the air until further notice. The REKA network carries English and other foreign language Kol Israel programming. I'm waiting to get more details regarding other Tel Aviv area frequencies which may be impacted (Doni Rosenzweig, April 5, DX LISTENING DIGEST)

\*\* JAPAN. I confirm R. Japan, NHK English at 0500 on 5975 to Europe via England relay; also 7230 via England. 6110 via Sackville to WNA, mired in heavy noise. The also announced 15195, 17810 and 21755 (Bob Thomas, Bridgeport CT, April 3, DX LISTENING DIGEST)

\*\* JAPAN. R. Japan DX Corner will be aired in the new program titled World Interactive from April as the Hello from Tokyo program was terminated. New program will be hosted by Ms. Kay Fujimoto and Mr. Ryan Drees who have been newscasters of R Japan.

First DX Corner in the new program will be aired on 3rd weekend, starting 15th of April, covering report from Winter SWL Festival held at Kulpsville, Pennsylvania, USA. The second program will be aired on the 5th weekend, starting 29th of April, covering the interview with Mr. Jerry Berg of USA, who wrote a book titled "On the Short Waves, 1923-1943". He is also a Chairman of CPRV, the Committee to Preserve Radio Verification.

Starting from May, DX corner will be aired every 2nd and 4th weekend of the month. The air time of World Interactive program is the same as Hello from Tokyo. Time and frequencies are: (Time in UTC), ( ) after frequency is the relay site.

\*\* LIBYA [and non]. SAWT ALAMEL EN PARALELO POR DOS FRECUENCIAS

Saludos cordiales, hoy 5 de abril a las 1204 se aprecia emisi n en paralelo en  rabe por las frecuencias de 17670 y 17680; la se al es pobre y acompa ada de un fuerte ruido, pero se trata de la misma emisi n. Desconozco de qu  emisora puede tratarse; por otra parte en 17660 est  emitiendo la m sica jammer en  rabe. En 17690 sin emisi n de La Voz de  frica. En 17685 probablemente Sawt Alamel; sin embargo a las 1228 se pierde la se al. Tambi n se pierde la se al en 17660 de la jammer  rabe.

Por otra parte en 17700 a las 1231 a Radio Solh con buena se al. Hasta esa hora no se hab a escuchada; quiz s comience hoy la emisi n a esa hora. Se escucha la sinton a y la ID con horarios y frecuencias de principio de emisi n.

A las 1255 en 17680 fuerte se al de pulso. A partir de las 1303 mejoran las condiciones y se aprecia que siguen transmitiendo en paralelo por 17670 y 17680. En 17660 no hay emisi n de m sica  rabe. A las 1306 la emisi n de 17670 pasa a 17675 y emitiendo en paralelo por 17680; sin lugar a dudas se trata de Sawt Alamel, hoy emitiendo en paralelo por dos frecuencias. Los Libios est n desconcertados; t midamente colocan se al de pulso en 17680 y luego pasan a 17675. A las 1313, con una fuerza descomunal entra emisi n de m sica mel dica, canci n en franc s en 17675. Nada en 17660 y a partir de ah  Sawt Alamel queda anulada (Jos  Miguel Romero, Spain, April 5, dxldyg via WORLD OF RADIO 1311, DX LISTENING DIGEST)

\*\* LITHUANIA. R. Vilnius, English to NAM at 2330 on 9875, quite noisy, just about heard. Improved Sunday April 2, great! Poor at 0030 on 11690, splash from 11700 (Bob Thomas, Bridgeport CT, April 3, DX

## LISTENING DIGEST)

### \*\* MARSHALL ISLANDS / MICRONESIA. Discontinuance of Mail Service

By chance, I came across the following from the USPS. If it has already been posted, my apologies, but it's news to me:

Beginning in January, the USPS discontinued postal services to the Marshall Islands and Micronesia. Since the USPS is no longer providing mail service, all ZIP Codes for these territories have been discontinued and removed from the USPS ZIP Code system. These ZIP Codes are considered invalid ZIP Codes and are no longer in our database. Mail sent to these territories will now be calculated using an international rate. Very 73 de (Mike Hardester, NC, April 5, DX LISTENING DIGEST) Ah, the only measure of true Independence! (gh)

I'm surprised it took this long -- the Marshalls and Micronesia have been independent (i.e. NON-U.S. territories) for a number of years now. The process started back in 1978 or '9 (Randy Stewart, Springfield MO, NRC-AM via DXLD)

\*\* MEXICO. 4810, XERTA, only audible in LSB; USB has a rather determined and omnipresent utility. XERTA signal strength varies from day to day; off the air on Sa Apr 01 from 0900 to 1200 (Robert Wilkner, Pûmpano Beach FL, DSWCI DX Window April 6 via DXLD)

\*\* MEXICO. Radio Educaciûn, 6185 at 0423, April 5th, man suddenly lapsed into English and gave postal address, some program info, mention of shortwave, then a snippet of Latin music followed by woman in Spanish w/ announcements; speech fair; music good (Eric Bryan, WA, DX LISTENING DIGEST)

\*\* NETHERLANDS. Radio Netherlands is helping to celebrate Rembrandt's 400th anniversary. The Dutch international broadcaster - an AIB member - has produced a drama series - a radio play in several language versions including Dutch, English, Spanish, Indonesian and Italian. This production showcases Radio Netherlands' new editorial policy, whereby material is shared as much as possible between the different language departments. ``The Edges of The Night Watch,`` written by Bies van Ede, is set in the present, and is about the spellbinding, worldwide search for a lost part that was cut off Rembrandt's most famous work The Night Watch, because it was too big to move. Through flashbacks, the story takes the listener back to scenes from the life of Rembrandt. The drama consists of three half-hour episodes, and is being offered free to the 3000 partner stations of Radio Netherlands around the world as well as to other interested broadcasters (AIB Newsletter 5 April via DXLD)

Hmmm, how about an English version of Radio Enlace? (gh, DXLD)

\*\* NETHERLANDS [non]. Marginal reception is still possible for the RN 14-16 UT English broadcast to Asia, via Madagascar 9890, as noted April 5; one really needs to tune to the hi side to avoid WEWN 9885, but then one finds some digital signal, fax? around 9892. RN not audible on the only other frequency, 11835 Madagascar, deep in the skirts of WYFR 11830. The Dutch service on 13735 via Madagascar, checked at 1352, would have been better but was suffering from squeal emanating from the China via Cuba transmitter on 13740, already on the air before 1400 with open carrier; the squeals were peaking about plus and minus 5 kHz (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* NEW ZEALAND. Re 6-058: Dear Glenn, A word of apology first: RNZI did not change from 9885 to 9855 (that would have been even worse, at least for some time here in Eur!) - that was simply me who made a typing mistake for which I am indeed very sorry as it may have misled some of the readers of DXLD and other bulletins too.

By the way, after I sent my message with that schedule, on 3rd inst., RNZI finally switched off 11725 shortly after 2115, and the "funny" thing is that // 15720 seemed to have vanished too: the signal was not good, far from it, but vanishing just like that in a matter of minutes due to propagation alone?! 73, (Carlos GonÁalves, Portugal, April 5, DX LISTENING DIGEST) See also PORTUGAL

\*\* OKLAHOMA. The OKC transmitter of OETA, KETA ch 13, went off the air at 2200 UT April 4, just in time for NewsHour --- and was still off 24+ hours later, depriving a megaperson of PBS. Including Enid, where Cox Cable has refused to tap into the available OETA satellite feed; most of the other OKC stations are now received that way. To its credit, OETA quickly put up a notice on its homepage saying they were trying to get it back on ASAP.

This happens all too frequently with KETA; I wonder if it has anything to do with the digital transition. KETA-DT is on ch 32, which I think is not up to full power yet, and is blocked anyway here by Enid's excuse for a local TV station, KXOK (analog). This nonsense spurs me to refurbish my VHF and UHF antennas to enable pickup of PBS from Wichita, Tulsa, or maybe Cheyenne. Or perhaps even try DT, but KPTS-DT ch 29 in Wichita, actually further Hutchinson, is not up to full power either per listings at <http://www.w9wi.com> Cox Cable Enid was putting a weak and intermittent signal thru on ch 13 Wednesday morning, probably KERA Dallas remnants with some tropo help, almost in the same direxion as OKC (Glenn Hauser, Enid OK, DX LISTENING DIGEST)

STILL off the air 43 hours later! As of noon CDT Thursday, this terse notice appeared on the OETA website: ``NOTICE: As of 5:30AM on

Wednesday, the Oklahoma City transmitter is off the air. We are working to correct the problem as soon as possible.``

Must be quite serious. I expect they don't want to spend much on the old analog transmitter. Back on at 2123 recheck, so less than 2 days lost (Glenn Hauser, Enid, DXLD)

Tnx for getting KETA back on the air in less than 2 days! I would like to know exactly what was the cause of such a long breakdown?

Here in Enid we are dependent on ch 13 off the air, or Cox Cable, which ALSO depends on off-the-air pickup. PLEASE push them (and the upcoming buyer Cebridge) to switch to satellite pickup ASAP!!!! They already get all the VHF stations from OKC via satellite, and most of the UHF.

Also, their offair pickup is not coming thru with stereo audio (when there is any), so I have to switch back to antenna for musical programs. Even tho 'stereo' is displayed on VCR or TV set tuners, it's not.

Even if I wanted to switch to KETA-DT, that is blocked by our local excuse for a LP TV station KXOK analog 32 --- and the latest info I have is that your DT is not yet running full power anyway, right?

How is channel 46 translator Medford getting OETA now? Maybe I should put up a big UHF antenna toward it as a backup, if it is no longer getting ch 13 off the air.

These questions are not exactly ``general`` --- why don't you have a subject in the dropdown for engineering matters? (gh to OETA, via DXLD)

\*\* PAKISTAN. Dear Glenn, You were quite right about my logging of Radio Pakistan in English to Europe. The programme is broadcast from 0730 until 0830 UT [not 0630-] on 15100 and 17835 kHz. The signal is strong and there is no interference but the audio quality is horrible. I have contacted both the engineering department and the producers of the English programme (pbcenglish @ hotmail.com) and I have heard from both of them. Hopefully they will be able to solve the problem otherwise its seems a waste of time and money to broadcast something which listeners cannot understand. The afternoon service in Urdu (17-19 UTC) on 7530 and 9365 kHz also offers strong signals but poor audio. Kind regards (Christer Brunstr m, Halmstad, Sweden, April 5, WORLD OF RADIO 1311, DX LISTENING DIGEST)

\*\* PAPUA NEW GUINEA. 7120, Wantok Radio Light, Apr 5, 0851-0855, ``Back to the Bible`` program, followed by religious songs till ToH,

ID for Papua New Guinea Christian Broadcasting and Wantok Radio Light, broadcasting on FM and short-wave, into ``Focus on the Family, brought to you with the support of 99 Import and Export, a company that is devoted to providing goods for a healthy family``, gives company phone numbers (323 4893, fax 323 0604 and e-mail address) and mentions ``Shopping Center`` (maybe part of their address?), at 0932 a public service announcement ``Brought to you by the Department of Health``, followed by program of religious music, fair (Ron Howard, Monterey, CA, RX340, with T2FD antenna, DX LISTENING DIGEST)

\*\* PERU. Cf. DXLD 5-216. Today I picked up briefly Radio Tahuantinsuyo (or Tawantinsuyo, as appears elsewhere) on 6175 kHz at around 0230 UT. My receiver has a resolution of 5 kHz so I can't tell whether the frequency was that or a slightly different one. Signal buried under the noise, I was lucky enough to hear the ID, a time check (UT -5) and some local music presented by a male announcer. Rx. Sony ICF-7600 DS+ 3 m wire (indoor) 73 (MoisÈs Knochen, Montevideo, Uruguay, April 6, DX LISTENING DIGEST) usually 6173v

\*\* PORTUGAL [and non]. RDPI & WYFR collision. Dear Glenn, About DXLD 6-058 of 04 APR, the RDPI lists just 100 kW for this Mo-Fri broadcast to India+ME on 15770, possibly the same power as that of WYFR. You may be getting an off centered back lobe, or even the main one, after it travels quite a bit till it reaches OK via So. Indian Ocean-AUS-NZL-Pacific. At that time, no other // broadcast is made, so no chance to compare signal delays.

The 17680 kHz 300 kW you hear co-channel with CVC in Chile is scheduled Mo-Fri 1600-1900 & Sat/Sun 1700-2000, and is beamed to Africa, STP-AGL-MOZ-AFS axis. On some days, CHL is quite audible even here despite co-channel RDPI, but mainly depending on the selected aerial. That's when received here, some 40 km westwards of the RDPI HF site in S,,o Gabriel; I'm partly in the skip zone when I monitor their broadcasts on the SW coast, meaning Chile's signals are a lot better down there.

I remember one particular occasion when noticed Voz Crist,, obliterating the BBC almost completely on 15485 kHz: rated 44544 as observed on the SW coast on 03 JUL 05 at 1431.

Today [April 5], there will be extensive coverage of a major international football match report held in Barcelona between a Portuguese team and a Catalan one. That means the RDPI will again be carrying another of its extra transmissions, viz.:

|           | kHz   | kW  | f   | area   |
|-----------|-------|-----|-----|--------|
| 1900-2300 | 9820  | 300 | 45  | Europe |
| 1900-2300 | 11945 | 300 | 144 | Africa |

|           |       |       |     |     |                     |
|-----------|-------|-------|-----|-----|---------------------|
| ?         | -2300 | 15560 | 300 | 300 | NAm                 |
| 1900-2000 | 21655 | 300   | 226 |     | B, C. Verde, Guinea |
| 2000-2300 | 15295 | 300   | 226 |     | ditto               |

those are but the continuation of regular broadcasts closing at 1900.

"?" is indeed a question mark: the sched. always mentions the complete allocated time slot, which in this case is "1200-2300" (!). Today, it's likely to start no later than 1700.

Football match reports remains as RDP's chief reason for using the reserved time slots allocated for those (silly) extra transmissions.

The HF site is partly automated for some time now, and frequency changes are indeed made in a matter of just a few seconds. The main drawback with automated sites occur when transmitters are off for hours on end until engineers reach the site and solve the problem. According to the current RDP policy, they don't mind if listeners are deprived from reception for a period rather than keeping technicians permanently on the spot. I wonder whether other similar HF centres work this way. I've been told a certain SRI HF site did. 73, (Carlos GonÁalves, Portugal, April 5, DX LISTENING DIGEST)

Rangitaiki, in remote New Zealand. It may take days for someone to get there to fix a breakdown (Glenn Hauser, DXLD)

Re. RDPI's A06 schedule, no mistake about the use of just 100 kW on certain occasions: the 261f rhombic to Venezuela, the 81.5f rhombic to India + MEast and the 142f rhombic (?) to Africa cannot handle 300 kW, so the 300 kW transmitters servicing those target areas must be adjusted to 100 kW, meaning none of the reserve units are used after all, i.e. unless strictly needed. Those are the four old 100 kW Continental Electronics.

The 1 x 100 kW Brown Boveri Co. reserve unit is inoperative for many months allegedly due to spares unavailability, so its fate is marked.

The CEOC-Centro Emissor de Onda Curta uses those 2 old rhombics, the 1989 Africa curtain array (does not cover 21 MHz; installed when the first 300 kW [AEG] unit was also purchased) plus new curtain arrays for Europe / Brazil-C. Verde-Guinea / Africa / N America. The one beamed to NAM was their latest novelty as was erected last year.

Automation. As explained in a previous message, the CEOC is automated. But, as I learned only after checking those details above, it is so, believe it or not, in an office manner, like 9 to 5! Again, are there similar sites out there operating this way? All above according to CEOC info.

Glenn, WYFR was almost undetected on 15770 kHz after the RDPI sign-off to India/ME at 1500.

Pro-Funk GmbH, Sines. Don't be surprised if two more transmitters plus the respective antennae are added in the future, particularly since operation costs in Germany (via DTK) are being considered too dear. Last Friday, 31st March, I was again driving south along the coast, and could see the "beginning" of the new 4 MHz fixed curtain array, which, as recently reported, is meant for DRM operation. It seems someone may be regretting having taken down the old fixed curtains years ago. Apparently, the not that visible vertical log-periodics are still in the site.

Still about DRM use --- it seems certain stations are merely pushing it in a non realistic manner; in other words, they're "burning kW" for nothing. It is as if the first combustion engine vehicle was invented and put to rest for years on end until the proper fuel is invented. 73, (Carlos Gonçalves, Portugal, April 5, DX LISTENING DIGEST)

\*\* ROMANIA. R. Rumania Internacional: apenas perceptible 9760; // 9775: inaudible. En 11935 // 11970 hay que adivinar de qué se trata ese hilo de señal, si es acaso español. Esto en el servicio de 0000 a 0056, el cual no dista mucho del anterior de B-05. No me dio por chequear qué ocurre a las 0300, pero presagio que la cosa no es muy distinta en su español a esta hora.

Ese problema que Glenn apunta sobre Radio Rumania es el mismo que padecen tristemente, un buen número de radiodifusores internacionales, es decir, pareciera que los ingenieros no se están ganando el sueldo como merecen. Si no, cómo se explica que muchos servicios permanecen durante meses y aún por años con una fuerte portadora y el audio parece estar en el excusado. Ya lo apunté como en un anterior envío en inglés como "...por Dios ¿qué desperdicio de Kw!".

Y este "guante va para que se lo planten", según el dicho tico, desde Radio Cairo (que parece haber mejorado) hasta Radio Damasco, y ahora Rumania y TIFC Faro del Caribe (Raúl Saavedra, Costa Rica, April 5, dxldyg via DX LISTENING DIGEST)

ESQUEMA A06 DE RADIO RUMANIA:

Cordiales saludos desde Bucarest. He aquí el nuevo esquema de nuestras emisiones en español:

0000 - 0100, 9760, 11935, Argentina  
0000 - 0100, 9775, 11970, México  
0300 - 0400, 9700, 11725, Argentina  
0300 - 0400, 6155, 9645, México

2000 - 2100, 11940, 15465, España  
2200 - 2300, 9575, 11940, Argentina

Gracias por todo, Victoria Sepciu, Sectia Spaniola RRI span@rri.ro  
Radio Rumania 73. (via Dino Bloise, FLORIDA, EEUU, dxldyg via DXLD)

A veces pareciera que de parte de emisoras como Radio Rumania, America Hispanoparlante se compone de Argentina al Sur y Mexico al Norte. Los dem's, no suframos ni nos resitamos, d'emonos por aludidos y si nos llega un "pringue" de la se0al, pues enhorabuena, disfrut'emoslo. Chas gracias (Ra'l Saavedra, Costa Rica, ibid.)

A lot of Europeans have CAm as target area, but let's see exactly what the azimuths of RRI are. For example at 0000, 9760 and 11970 are from Galbeni at 280 degrees, while 9775 and 11935 are from Tigresti at 247 degrees (Glenn Hauser, DX LISTENING DIGEST)

I've heard RRI Bucharest, with fair propagation, audio above QRN, fade, English at 2140 on 9530. Could not hear their schedule. Later, English hour at 2300 announced and monitored:

WEu on 6140 --- JBA due to 6145 CRI English relay; 7265 very good.  
NAM on 9645, poor-good, varies signal 4-5, high QRN and N [nothing?] on 11940 (Bob Thomas, Bridgeport CT, April 3, DX LISTENING DIGEST)

RRI April 4, 2006, 9690 kHz, 0100-0139 UT, SIO 454. "Radio Newsreel", commentary, "Pages of Romanian Literature", "Letter From Bucharest" and "DX Mailbag". 73, (Kraig Krist, KG4LAC, Manassas, VA, dxldyg via DX LISTENING DIGEST) 310 degrees from Galbeni (gh)

\*\* RUSSIA. Since 25th Mar, GTRK-Sakhalin on 279 kHz has changed sked of its own local program, as:

Su-Th 2010-2100 in Russian  
Mo-Fr 0210-0300 in Russian  
Fr,Sa 2310-0000 in Russian  
Korean program is carried at 0110-0200 on Saturday only. This station relays Radio Rossii from 1900 thru 0000 except above.

--

As for my all information it is for all people. But I prohibit the fact that all ILG's personnel utilize. 73 & FB DXing! (Kenji Takasaki, in Mie pref, JAPAN, JRC NRD-545/535D/525/515, April 6, HCDX via DXLD)

\*\* SINGAPORE [non]. I reported the first Wavescan, Jan. 1, and got the QSL today, but although my name and address was correctly written on the right side of the card, the left side said: "TO: Dmitriy Kutuzov" - wonder if he got a card with my name on it? 73, (Erik K'ie, Copenhagen, April 5, dxldyg via DX LISTENING DIGEST) Now on WRMI: USA

\*\* SLOVAKIA. Radio Slovakia Int'l, on 7230 at 0100, March 25, Slovakia Today, Friday edition, announcement of frequency change, new North American service frequencies of 5930 and 9440 effective 3/26; interview with US ambassador to Slovakia; very nice low-noise signal, but on & off clobbered by SSB hams; also announcement of iffiness of future of SW broadcasts (Eric Bryan, WA, DX LISTENING DIGEST)

\*\* SRI LANKA. SLBC Drifting on 7 MHz --- Dear Friends, The Hindi morning Service of SLBC Sri Lanka was noted today 6 Apr 2006 at around 0130 UT onwards on around 7062 kHz with very distorted audio. Half an hour later they were on 7007 kHz. They used to be around 7031.5. The parallel frequency is 11905 (Jose Jacob, India, dxldyg via DX LISTENING DIGEST) You mean, used to be on 7301.5? Original nominal for this was 7275, as in WRTH 2006, but clashed with India, and lately at 7301.5 (Glenn Hauser, DXLD)

\*\* THAILAND. 9805, R. Thailand, 1900 March 3, ``This is HSK9``, news for Thursdays, but it's Friday!! English, SIO 454 (Steve Calver, Letchworth, Herts, April BDXC-UK Communication via DXLD)

\*\* TURKEY. Voice of Turkey, 6140 at 0340, April 4th, woman in English with traditional and pop music; gave frequencies, schedules, internet and postal addresses; off at 0350; fair to good signal, but some co-channel QRM in Spanish -- Lider or RHC? Heard VOT very clearly recently on 7270 after R. Cairo sign-off, man with American accent giving IDs, etc.; hope 6140 will allow me to hear them from 0300 (Eric Bryan, WA, DX LISTENING DIGEST)

\*\* U K. RE: Meanwhile "London Calling" is listed in the BBC Radio Player [http://www.bbc.co.uk/radio/aod/worldservice\\_promo.shtml](http://www.bbc.co.uk/radio/aod/worldservice_promo.shtml) but the link is currently misconfigured. They're working on fixing the link but haven't said when it will be fixed (Rich Cuff, PA, DX LISTENING DIGEST) Connects at 1800 UT April 4; now to find an hour free to listen to it (gh, DXLD)

It connects but it is playing an edition of Newshour. I have emailed the BBC World Service Radio Player using the form at: <http://www.bbc.co.uk/worldservice/us/contact/index.shtml> Encourage others to do the same if it is not fixed when they wish to listen (Mike Barraclough, UK, April 5, DX LISTENING DIGEST)

The link to the BBCWS London Calling programme has now been fixed (Mike, 1539 UT April 5, *ibid.*) Viz.:

BBCWS PROGRAMME ON ITS CENTRAL EUROPEAN LANGUAGE SERVICES

BBCWS broadcast a 48 minute programme London Calling on Sunday where

David Sells told the story of these services from the Second World War through to the collapse of the Berlin Wall and the wars in Yugoslavia in the 1990's. The last part of the programme deals with the recent axing of these services and the BBC World Services soon to be launched Arabic TV service.

There are quite a few historic recordings in the first part of the broadcast including an interview with broadcaster Georgi Markhov who died in London after being poisoned by being stabbed in his right thigh with an umbrella by a man who was believed to be working for the Bulgarian secret service.

The Listen Again link to the programme was incorrectly set up but has now been corrected so it will be available for online listening until Sunday, the link below will launch the programme on the BBC Radio Player. I will be playing the programme at the Reading International Radio Group meeting on Saturday: <http://snipurl.com/oq5d> (Mike Barraclough, worldclub via DXLD) Recommended! gh

\*\* U K. Re: 6-056, BBC WS commissioning --- "The whole business of commissioning programmes from independents is, however, the real joke here. Most of them are run by ex-BBC executives, who leave the Corporation and set up companies which receive lucrative production contracts to fulfill the rules imposed by the government on giving "independent producers" a fair share of the airtime. They may be independent on paper, but since they're run and staffed largely by people who used to work for the BBC, they might as well be produced in-house at a lower cost. But it's not the BBC's fault - it's the system"

I disagree with Andy's view. In their submission to the BBC Charter Review the Radio Independents Group said:

"An objection often made to raising the Independent quota is that "the indies are all ex-BBC staff anyway --- it's just moving the deckchairs around". That is untrue as many independent production companies have either no ex-BBC staff or a mix of ex-BBC and non-BBC people. We are very happy with that mix --- it provides some reassurance to those within the BBC who find it difficult to believe that "outsiders" can make programmes to their standards, and we find this "mixed economy" is creative and productive."

There are around 100 radio independents; many of their ideas do not get commissioned.

The legal obligation to have a certain proportion of output produced by independent producers applies to TV and not radio, this was not changed despite lobbying, in the Charter Review; on radio there is a

voluntary target of 10% or 6% if you take into account output the BBC considers ineligible. On television commissioning, BBC Chairman Michael Grade said last May:

"The governors have confidence that the proposal for a WOCC - a window of creative competition - is the best way to open up BBC commissioning and the licence fee to independent producers, while maintaining a sustainable in-house production base with all the benefits that brings: including, not least, the training it provides across the broadcast industry. It will only work if there is a level playing field between in-house and independent commissioning. The governors will police this rigorously - by which I mean zero tolerance. In the near future, the Board will consider detailed plans from management designed to ensure meritocracy and transparency in the way the BBC commissions all output."

Like the Radio Independents Group, I see no reason why this cannot be applied to radio, both domestic and international. As a listener I just want the best possible programmes whoever makes them.

As to cost, the programme budgets are subject to financial controls. It is not easy to compare the cost of in-house productions and independent commissions because you are not necessarily comparing like with like; you would need also to take into account staff and premises costs when looking at in-house bids.

<http://www.radioindependentsgroup.org/>

Their response to the BBC Charter Review available here:

\*\* U S A. PROPOSED CUTS WOULD EVISCERATE ENGLISH-LANGUAGE VOICE OF AMERICA --- By Georgie Anne Geyer

WASHINGTON -- My first reaction, when I heard that the Voice of America is going to abolish most of its English-language programs to the world, was how downright stupid such a move is.

Since President Eisenhower founded organizations like the Voice after World War II [sic] as instruments to defend the United States by broadcasting fair and accurate news to the world, the Voice has been an inexpensive treasure house to the nation. It has influenced countless leaders, often when they were young, standing in the fields and back alleys of dictatorships and autocracies for whom the very word "news" is subversive.

Today, English has blossomed as the common language of the world. One-

third of the world's population speaks English, and more than half will speak it by 2050. I was recently surprised to hear that big French oil companies -- the French, with their hubristic pride of language! -- speak English on a commercial basis. The United Nations speaks in English, as do most other world organizations.

Two weeks ago, Al-Jazeera, the fearsome TV network that has challenged American news across the Middle East, flamboyantly announced its new 24-hour broadcasts in English. The Russians and the Chinese are right behind, again with 24-hour broadcasts or Web casts.

But even though the proposed budgets for VOA and the U.S.-sponsored Middle East Broadcasting Networks have gone up (5.3 percent for VOA, 13 percent for Middle East Broadcasting Networks), VOA's flagship for the English service, "News Now," will be cut completely. One of the most popular American programs across the world, it broadcasts worldwide 14 hours a day on shortwave and includes hourly news updates, correspondent reports and longer programs on science, education and other subjects. (I should note here that I have been, for some years, a frequent guest, with two other working journalists, on the VOA news discussion program, "Issues in the News.") English content will continue only on the Web and special broadcasts for limited English speakers.

Sanford J. Ungar, director of the Voice from 1999 to 2001, said after the budget proposals were put forward: "The broadcasting board of governors and the Bush administration are eliminating the heart and soul of the Voice of America. It would be better if they would just say that they intend to destroy the Voice of America and be honest about it."

The English language itself, with its clear structure and boldness of expression, is a perfect rhetorical expression of democratic principles. As former British Prime Minister Margaret Thatcher said in Washington in 1999, "The values of liberty, a bold sense of adventure, and ability to adapt and change are mirrored in this language, four-fifths of whose vocabulary was borrowed from other languages."

But something else -- something important, threatening and dangerous -- is going on here.

As Mark Helmke, senior adviser to the Senate Foreign Relations Committee and a specialist on the American radios, told me: "They're doing this because they want to shift more resources to the Middle East. Even with the educational exchanges, where we spend a mere \$400 million, which includes Fulbright, Muskie and other programs, they are taking scholarships from Russia and Ukraine and putting them in the Middle East. It depends upon whether your world view is 9/11 or

November 1989, when the wall fell."

By expanding service to Iran (the administration's new bogeyman), and increasing Middle East television news coverage to Alhurra, a TV network run separately from the VOA, and radio to Radio Sawa, the United States is unnaturally tying itself closer to only one part of the world -- and ignoring the rest. Its directors on the Broadcasting Board of Governors are empowering the separate Middle East Broadcasting Networks to be -- let's say it -- propaganda networks.

Now our broadcasting is teetering on the edge of becoming a propaganda network that talks about democracy but doesn't at all understand the qualities necessary for it.

When the United States formally handed over power to an Iraqi prime minister a year and a half ago, nobody from Washington was on the air. When there were elections in Egypt, Iraq and Palestine, VOA English was barely audible. The English-speaking elites of these and many other countries are, not surprisingly, ignoring both Alhurra and the pop radio Sawa as not worthy of their attention. During the fighting in Fallujah in Iraq, Alhurra was programming cooking shows and documentaries about monkeys.

Respected University of Maryland professor Shibley Telhami released a six-nation survey on Arab media habits in December 2005, in which he found that Arabs were watching Al-Jazeera, 45 percent, and Alhurra, 1 percent, with Arab networks making up the difference.

The reason given for killing most English-language programs was that they were on shortwave -- but no effort was made to broaden their broadcasting. Mark Helmke points out that no studies have been done to see who watches what or where the elites are listening. In addition, Arabs today are influenced by the realities of American policy (read, the Iraq war) and not by propaganda and pop music.

So we get more of this administration's obsession with the Middle East, its lack of understanding of the power of fair and accurate reporting, whether in Washington or to the world, and its propensity toward propaganda. It's not a done deal yet, and Congress could change it -- if, of course, anybody's paying attention there (Yahoo News via Mike Cooper, DXLD)

\*\* U S A [non]. VOA's Talk to America at its new time of 1405 UT M-F is certainly more convenient for breakfast-time listening in WNA; 24 hours after our last report, none of the additional frequencies were audible due to very poor propagation on the higher bands --- 17720, 15580, 15490; in fact, the only signal of any consequence on 16m was Chile 17680. Coming in well, tho, subject to overload from Delano

9775, via Philippines 9760. April 5 show was about film festivals. Host is no longer Doug Bernard but did not get new host's name; is this a permanent change? (Glenn Hauser, OK, DX LISTENING DIGEST) See FRANCE for SEC report at these hours. Latest revision of VOA sked:

## **\*\* U S A. VOA BROADCAST FREQUENCY SCHEDULES**

Effective through 29 October 2006 Schedule effective 3 April 2006

Notes: All times and dates are Coordinated Universal Time (UTC), same as Greenwich Mean Time (GMT).

Frequencies are in kiloHertz (kHz). 1 MegaHertz (MHz) is equal to 1000 kHz. Conversion to meter bands: Meters=300000/frequency in kHz. e.g.: 17705 kHz --> 16.9 meters

Abbreviations: All programs/frequencies are on daily unless noted otherwise.

- & - Monday only
- \* - Monday through Friday
- = - Monday through Saturday
- < - Tuesday through Friday
- / - Tuesday and Friday only
- # - Tuesday through Saturday
- % - Tuesday through Sunday
- ~ - Thursday only
- > - Friday and Saturday
- @ - Saturday only
- \$ - Saturday and Sunday
- " - Sunday only
- + - Sunday and Monday
- ^ - Sunday through Thursday
- ! - Sunday through Friday

\*\* U S A. Tell me, was ANYONE out there except me listening to 7465 kHz on 3/30/06 in the 2100-2200 UT time period? I tuned in at 2145 UT and there was a vitamin-peddling program on, and then at 2200 there was a WBCQ ID. Then Good Friends Radio with Radio Weather came on.

Note that I said a \*WBCQ\* ID and 7465 kHz. Not 7415!

I was surprised about this -- WBCQ on 7465? But I just noted it and figured that the FCC had ordered a frequency change. I didn't think that Allan had another transmitter to add a fourth parallel frequency (or enough antennas?) but at the time we hadn't had any new info from WBCQ or schedule updates for a while.

But then on Friday night's Allan Weiner WorldWide he gave the schedule updates we've now seen here and did NOT mention 7465. I was able to

call in to the show, getting in the last call right at the end, and asked him about it. He said that it was NOT WBCQ! He said that someone else was transmitting a program that included the WBCQ ID. He said that it was not physically possible for WBCQ to transmit on 7465, due to the transmitter design.

This timeframe would indicate that WWCR might have been transmitting on 7465 at that date & time. But I never heard a WWCR ID; it was Allan's voice with one of the regular WBCQ IDs. Also, the sked info I had indicated that WWCR didn't start 7465 kHz until 2200 UT.

I cannot believe that I would have gotten this so wrong. But I sure would like to see if someone else heard this and can prove that I am not completely crazy! (Insert Twilight Zone music here...)

This was a strong signal, by the way, not some weak possible pirate. It had to have been one of the regular US SW broadcasters. But I cannot figure out how the WBCQ ID could have gotten on the program recording from the producer and thus get inadvertently transmitted from a different station. So can anyone explain this or is it just another sign of the Apocalypse? 73, (Will Martin, MO, April 5, dxldyg via DX LISTENING DIGEST)

\*\* U S A. Have other people been hearing some sort of clash of programs on 5765 kHz? It seems to me that many evenings lately that there have been multiple competing programs on that frequency. One of them (at least) is Pastor Pete Peters, but I'm not sure of the other.

What I am wondering is whether this is actually two different transmitters or if this is an audio mix coming from the program provider itself, putting a mixed audio signal as the input to just one transmitter, and that they're just sending out whatever garbled audio the customer is paying them to transmit.

I think this is coming from WWCR if the latter is the case. If so, and the original audio from Peters is NOT mixed, could it be cross-modulation or cross-talk mixing different programs within the WWCR board or audio cabling? 73, (Will Martin, MO, April 5, dxldyg via DX LISTENING DIGEST)

\*\* U S A. Glenn: I have hastily prepared a program schedule which is on the temporary website now. I was able to get WOR on an hour earlier (0400 UT) on Friday night/Saturday morning until further notice. However, we have a probable buyer for the 0400 hour five days a week within the next few weeks, so in that case we would have to go back to 0500 UT Saturday for WOR. I'll let you if this happens (Jeff White, WRMI, April 5, DX LISTENING DIGEST) Viz.:

# WRMI TRANSMISSION SCHEDULE/HORARIO

Effective April 2, 2006/A partir del 2 de abril, 2006

Broadcast schedule in UTC (Coordinated Universal Time):

Daily 0400-1400 UTC on 9955 kHz (31 meter band) to the Caribbean and Latin America in Spanish and English.

Friday 1330-1400 UTC on 17550 kHz (16 meter band) to East Africa in Somali via relay in Germany.

Daily 1400-1600 UTC on 7385 kHz (41 meter band) to North America in English.

Daily 1600-1700 UTC on 13620 kHz (22 meter band) to the Maldive Islands in Dhivehi via relay in Germany.

Daily 1600-2100 UTC on 9955 kHz (31 meter band) to the Caribbean and Latin America in Spanish.

Daily 2100-2200 UTC on 7385 kHz (41 meter band) to North America in English.

Monday-Friday 2200-0400 UTC (this is UTC Tuesday-Saturday after 0000) on 7385 kHz (41 meter band) to North America in English.

Saturday and Sunday 2200-0400 UTC (this is UTC Sunday and Monday after 0000) on 9955 kHz (31 meter band) to the Caribbean and Latin America in Spanish and English.

Monday-Friday 2300-0400 UTC (this is UTC Tuesday-Saturday after 0000) on 5910 kHz (49 meter band) to the Caribbean in Spanish via relay in Germany.

Transmitter Site: Hialeah, Florida, USA

Transmitter Power: 50,000 watts (plus 5,000 watt auxiliary)

Antenna Azimuths: 160 degrees to Caribbean and Latin America, 317 degrees to North America.

\*\* U S A [non]. PIRATES --- We normally do not include information about pirates, but here is an extraordinary item about the latest technology:

6220, Voice of Joy. On Apr 02, I got an e-Mail from them. Their address is voiceofjoy @ comcast.net They changed their spring broadcast time effective Mar 31 to Saturdays 1900. They also mentioned: "If you have a headset and sound card on your computer, you can contact us via Skype 2.0 Computer Telephone Software: It is free; all you need is a headset and sound card and a connection to the internet. We would love for you to contact us! Happy Listening and God Bless You. The Voice of Joy Music Hour. Skype: voiceofjoy @ comcast.net Skype.com Computer Telephone software". (Eckhardt Roescher, Dessau, Germany, Apr 03, DSWCI DX Window April 6 via DXLD)

\*\* U S A. New Jersey's WHWH pulls the plug at midnight tonight --- According to CE Neal Newman, Moneytalk 1350 in Princeton is signing off for the last time tonight. WTTM 1680 is the expanded band sister and the five years is up and under the terms of the license, somebody has got to go. Looks like it's 1350. WTTM has been moved 70 miles south to Lindenwold, N.J. Due to the close spacing to 1660 (Jerry Kiefer, NM, April 6, DX LISTENING DIGEST) So it ends at 0400 UT Fri

\*\* URUGUAY. Re 6-058: Es difícil imaginarse para qué las estaciones domésticas (incluyendo el SODRE) pueden querer transmitir en onda corta. Si es por la di-sspora uruguaya, parece estar perfectamente abastecida por las radios uruguayas en internet. En este sentido se

podría decir que Uruguay no sólo sigue la tendencia mundial sino que es pionero al abandonar totalmente la onda corta! :- ) (:- ( ... )  
(Moisés Knochen, Montevideo, Uruguay, April 5, WORLD OF RADIO 1311, DX LISTENING DIGEST)

Latest news from Uruguay concerning the trial of the owners of (among others) stations of Concierto FM (Montevideo) and Concierto Punta FM (Punta del Este). According to the press, the Judge in charge of the investigation of a tax fraud estimated in US\$ 12 million has decided that they should be imprisoned while the trial goes on. Please see the following link from newspaper La República:

<http://www.larepublica.com.uy/lr3/?a=nota&n=207377&e=2006-04-06>

(Moisés Knochen, Montevideo, Uruguay, April 6, DX LISTENING DIGEST)

\*\* UZBEKISTAN. Despite the fact that Radio Tashkent has been reported off the air, you can still try for Uzbekistan in English via CVC International: 0100-0300 7355; 0300-0600 13685 (MARE Tipsheet April 6 via DXLD)

\*\* VATICAN [non]. Ran across Catholic news in Spanish from Vatican Radio on WEWN 9885, April 6 at 2110; used to be at 2200. Yes, per <http://www.ewtn.com/ewtn/spanish/ewnspan4.asp> which does not show UT, it has now shifted to M-F 1500-1530 and 2100-2130 UT, converted from ``Miami time`` (who cares what time it is in Miami?) on 9885 and 15745 (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* VENEZUELA. QSL Recibida Estacion YVTO, 5000 kHz. Tarjeta QSL recibida firmada por el Director Luis Ojeda Pérez. Folleto informativo de Estación YVTO. Carta personal firmada por Jesús Alberto Escalona, Jefe del Servicio de la Hora Legal de Venezuela. Demoró 23 días. El informe de recepción se envió a la siguiente dirección electrónica: shlv @ dhn.mil.ve confirmando el mismo día y que estaría enviando la QSL. Dirección :

Dirección de Hidrografía y Navegación

Apartado Postal 6745

Caracas - Venezuela

(César Rojas Gordillo, PERU, April 5, Noticias DX via DXLD)

\*\* ZIMBABWE. Hearing an unID station on 6612 kHz at about 0015 UT last night (AM mode). I was unable to listen for very long (other pressing issues), but was playing great African music. Fairly strong signal. Any guesses or solid information on this? Regards, (Dave Zantow, WI, April 6, dxldyg via DX LISTENING DIGEST)

David, This will be the 2nd harmonic of ZBC Radio Zimbabwe (2 x 3306 kHz = 6612 kHz). Was also heard on 6688 kHz back on 26th March, then seemed to return to 6612 (heard here on 31 March) where it's a regular (so much so that the 2006 WRTH mentions it in the Zimbabwe country

entry) (Alan Pennington, Caversham, UK, ibid.)

I see this covered in DXLD #5-146 now;; sorry for the bother on this. But wow, what a strong signal it was last night. Regards, (Dave Zantow, ibid.) And many subsequent issues (gh)

UNIDENTIFIED. I've been hearing some new QRM for a few weeks and seen folks on the FRN describe the same thing. It usually consists of two buzzes, each lasting several seconds. The first is usually at constant pitch and the second at falling pitch, but there have been variations at times. It completely wipes out any station on and seems to be on almost all bands, but is rather frequency specific. It's just a buzz, nothing at all like the "swiper" or the old "woodpecker" (Harold Frodge, MI, MARE Tipsheet April 6 via DXLD)

UNIDENTIFIED. 5420, 2252 UT 15 March, violin music, then OM & YL in unID language before singing, SIO 333 (Kevin O'Daly, Rickmansworth, Herts, Icom R71E +ATU, longwire, Sony ICF2001D, April BDXC-UK Communication via DXLD)

UNIDENTIFIED. 17837.1, 2150-2200\*?, 3 April; M in Spanish with phone interview. Promo at 2150:40, then disappeared. Radio Imperial, El Salvador maybe? Poor, from nothing to copyable peaks (Harold Frodge, MI, MARE Tipsheet via DXLD)

We hope, but more likely spur from Voice of Greece via Delano from 17705, which is again in use this A-season, and closes at 2200\* sharp. Next time, please see if it matches 17705, as we managed to do last summer. Of course it's in Greek, not Spanish, but they can be confused on a weak signal (Glenn Hauser, OK, DX LISTENING DIGEST)

UPDATE ON SHORTWAVE LISTENING, U. of ST THOMAS, ST. PAUL, MINNESOTA  
April 6, 2006 Bulletin Today

Steve Kremer will discuss short wave radio at UST Radio Club meeting tomorrow. The University of St. Thomas Radio Club will hold its monthly meeting at 7:30 p.m. [CDT = 0030 UT Sat] this Friday, April 7, in Room 155, Murray-Herrick Campus Center.

Steve Kremer will present a program titled "Update on Short Wave Listening." His program will be a basic guide to shortwave (SW) radio and include what can be found in the SW spectrum. He chose to speak on some of the basics because many of the newer hams didn't get their

start with SWling, but rather with CB and the like. This opens up a whole new perspective of the radio hobby for them.

Kremer started listening to SW when he was 9 years old with a Hallicrafters Sky Challenger receiver and a wire cut for 40 meters. This was back in the '50s when propagation was probably the best he has ever experienced and he was hooked. He built several SW sets and has kept up his listening through the years.

Kremer likes listening to just about everything, including SW broadcasts, aircraft, utilities and Radio Amateurs. He has held shortwave seminars at local club meetings and also at Hamfest Minnesota. He holds an Extra Class Amateur License, KN6F, and is active on both HF and the repeaters. He writes an SW column for the Quarterwave, a Twin City FM Club newsletter.

Kremer is a professional singer and guitarist and performed with several famous people in the folk era. He has written and performed commercials and toured, off and on, for about 20 years in the '60s and '70s. He still plays locally, mostly at churches and private events. He also manages a distribution sales network for a local electronic manufacturer's representative firm (via Mike Terry, dxldyg via DXLD)

St. Thomas has four campuses. We are supposed to know where this building is? It's the St. Paul MN campus, building #5 on this map:

DIGITAL BROADCASTING  
+++++

HD DX

It ain't much, but at least it's something...

<http://www.w9wi.com/images/wowo-hd-1.jpg>

<http://www.w9wi.com/images/wowo-hd-2.jpg>

Received this morning on a Boston Acoustics Receptor HD and a 160m dipole (260' center-fed) antenna. Only the text ID was received - no digital audio.\* The WOWO analog audio was loud & free of noise & interference at this time. Quality of the photos isn't very good due to poor lighting. Pleasant View<=>Ft. Wayne is very roughly 330 miles.

--

\* The R(B)DS system has allowed FM DXers to receive "text IDs" on analog stations. FM DXers consider them valid DX loggings even if no audio is heard (Doug Smith W9WI, Pleasant View (Nashville), TN EM66, <http://www.w9wi.com> NRC-AM via DXLD)

There is no IBOC in Canada, except for what drifts over the borders, and our brave government and industry gurus rejected it in 1995 as unworkable - on the AM band at least.

Of course, those same gurus embraced Eureka 147 DAB on the L Band... And we all know that the L Band stands for: The Laugh Band.

Second largest country in the world in land area and we embrace a technology that boasts a 10 to 15 mile maximum radius from the transmitter site.

Our Gurus can goof too (Phil Rafuse, PEI Canada, An IBOC Free zone [except radio waves do not respect borders] ABDX via DXLD)

#### BBCWS ON DRM

There's an extremely interesting 14 page article by Julian Cable of BBC World Service on DRM in the latest EBU Technical Review, thanks to DK8CB on the drmr.org forums for spotting the link (14 page pdf): [http://www.ebu.ch/en/technical/trev/trev\\_306-drm-bbc.pdf](http://www.ebu.ch/en/technical/trev/trev_306-drm-bbc.pdf) (Mike Barracrough, UK, DX LISTENING DIGEST)

#### DRM: HOW DOES IT PLAY IN THE REAL WORLD?

Digital radio mondiale (DRM) is a digital modulation technique being pushed for international shortwave broadcasting as well as for AM/FM broadcasting in parts of the world. Like IBOC/HD, DRM promises all sorts of benefits --- "CD quality" sound, etc. --- for listeners. But, again like IBOC/HD, DRM can't get around the inherent limitations of ionospheric propagation and the resultant "drop-outs" when the signal fades. Glenn Hauser's World of Radio web site carried a report on attempts made at the recent Winter SWL Festival in Kulpville, PA, to receive DRM signals from transmitters at Sackville, NB, Canada and Bonaire, Netherland Antilles. The results were not very encouraging (the material isn't permalined; you will have to scroll down to the end and the section headed "Digital Broadcasting"). [6-057]

DRM on shortwave is clearly a debacle, and I'm not sure why international broadcasters continue to pursue this dead end --- maybe it's just a stubborn unwillingness to admit a mistake, even in the face of overwhelming evidence you're wrong. Anyone with half a brain should realize that digital modulation techniques have no place on frequencies subject to regular skywave propagation. Period.

More international broadcasters should follow the lead of the BBC. The BBC wisely cut back on its shortwave transmissions to North America a few years ago, and now its programming is widely available via satellite radio (both XM and Sirius), podcasts, and streaming

audio; they probably have a much greater audience in North America via these new delivery platforms than they ever did via shortwave. Shortwave may still make sense for reaching the less developed areas of the world, but for North America, Europe, Japan, Australia, etc., newer technologies are more cost effective and reach larger potential audiences.

International broadcasters need to stop being such Luddites. Is their mission "international broadcasting," or is it really "operating shortwave transmitters"?? Posted on April 05, 2006 (Harry Helms, future of radio blog via DXLD) see also FRANCE, GERMANY, PORTUGAL, UK

#### 26 MHZ DRM TRANSMISSIONS

Here is a list of local stations broadcasting in DRM in the 11 meter broadcastband. I know of two more stations, which are located in MEXico D.F. and Rio de Janeiro, but I do not have their frequencies yet. It remains to be seen if these are DX targets like the 100 Watts FM-Feeders from the U.S., we catch around 26 MHz on this side of the Atlantic every now and then. Not all stations are active at all times.

Freq / power / ITU / site (station)

25705 kHz ñ 80 W ñ D ñ Hannover (Digital 11)  
25765 kHz ñ 400 W ñ F ñ Mendon (TDF)  
25775 kHz ñ 100 W ñ F ñ Rennes (TDF)  
25795 kHz ñ 150 W ñ LUX Junglinster (RTL)  
25825 kHz ñ 80 W ñ D ñ Hannover (Digital 11)  
25915 kHz ñ 80 W ñ D ñ Hannover (Digital 11)  
26000 kHz ñ 100 W ñ D ñ Dillberg (Campus Radio)  
26000 kHz ñ 1700 W ñ G ñ London-Croydon (WRN)  
26012 kHz ñ 10 W ñ D ñ Nuernberg (Campus Radio)  
26035 kHz ñ 80 W ñ D ñ Hannover (Digital 11)  
26045 kHz ñ 80 W ñ D ñ Hannover (Digital 11)  
26080 kHz ñ 400 W ñ G ñ Crystal Palace (WRN). (Harold Kuhl, Germany, DSWCI DX Window April 6 via DXLD) Please tell me if anybody are able to hear these low powered DRM-stations outside their local target area (Anker Petersen, Ed., DSWCI DX Window April 6 via DXLD)

#### POWERLINE COMMUNICATIONS

+++++

#### FCC STATISTICS SUGGEST MINUSCULE MARKET SHARE FOR BPL

(Apr 4, 2006) -- The latest FCC statistics on the status of high-speed Internet services indicate a minuscule market share for broadband over power line (BPL). The FCC Wireline Bureau report, "High-Speed Services for Internet Access: Status as of June 30, 2005,"  
[http://hraunfoss.fcc.gov/edocs\\_public/attachmatch/DOC-264744A1.pdf](http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-264744A1.pdf)

puts at 4872 the number of business and residential "Power Line and Other" connections that deliver at speeds greater than 200 kbps in at least one direction. The total number of high-speed lines for all technologies is 42,866,469 -- the vast majority DSL, cable and traditional wireline connections. This puts the share for "Power Line and Other" at a bit more than 0.01 percent of the total. The number of residential BPL "advanced services" lines -- greater than 200 kbps in both directions -- is 3916 out of 34,259,411, the FCC report indicates. Although some data have been withheld as proprietary, the FCC report indicates there are 18 "Power Line and Other" high-speed providers nationwide. Facilities-based broadband providers must report the number of high-speed connections in service to the FCC twice a year. (Source? ARRL? Via Bill Smith, IA, DXLD)

#### PROPAGATION
